

WORKING FOR **OUR** COMMUNITY

Hunter New England and Central Coast Primary Health Network (HNECC PHN) is a not-for-profit organisation. We aim to improve health services in our community.

WHAT PHN DOES

- We listen to communities to find out their health needs and issues
- We then look to fund organisations to deliver services that best meet these needs
- We work with other health organisations to try and make it easy for you to find and get the care you need
- We work with doctors and allied health (physios, psychologists, etc) to help their patients stay out of hospital
- We support doctors to ensure they provide safe and high-quality care.

HOW YOU CAN HELP US IMPROVE LOCAL HEALTH

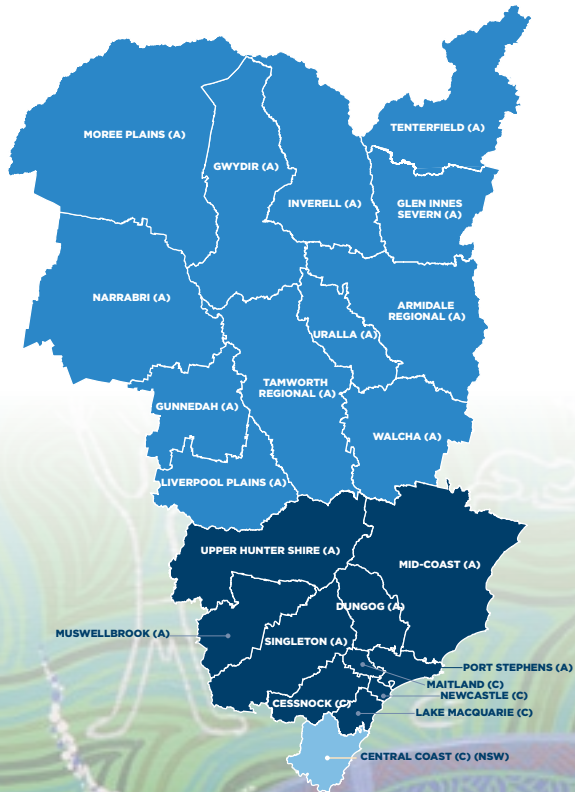

We have three Community Advisory Committees who represent our regions. We have one for the Hunter and Manning region, one for the New England and one for the Central Coast.

Their role is to provide us with local feedback and advice on community health issues.

If you have suggestions or issues that you would like your local Community Advisory Committee to raise, you can send an email to your Hunter and Manning committee at **community@hneccphn.com.au**.

THE PHN REGION

PEOPLEBANK

Another way to have your say on local health issues is through our **peoplebank** website.

Peoplebank allows you to share your ideas and stories.

You can also give feedback on projects we are working on to create healthier communities.

You can register at peoplebank.hneccpnhn.com.au.
