  - Meeting concludes

**LEARNING OUTCOMES**

The “Green Whistle”: Practical applications of Penthrox® in primary care?
- Analyse the clinical properties of methoxyflurane (Penthrox®)
- Review the evidence for Penthrox® for emergency pain relief and pain relief during surgical procedures
- Learn how to access Penthrox® in the primary care setting

Juggling the complexities of managing chronic non-cancer pain
- Apply a biopsychosocial approach to the assessment and management of chronic back pain
- Stratify psychosocial risks to guide the use of non-pharmacotherapies in the management of low back pain
- Utilise best practice principles when prescribing opioid analgesics for chronic non-cancer pain
- Apply appropriate therapeutic structure to opioid prescribing
- Know when and how to stop opioid therapy
